AISHA SAEED

web developer

About Me

I am an IT student at GIAIC, Actively chase the CLOUD APPLEID GEN AI ENGINEERING AND TYPESCRIPT, currently enrolled in college. I recently completed my matriculation, and my background is in MEDICAL STUDIES. In addition to my academic pursuits, I am learning to speak ITALIAN as part my LANGUAGE STUDIES. My goal is to combine my IT skills with my MEDICAL KNOWLEDGE to contribute to innovative projects in healthcare technology. I am committed to continuous learning and personal development, and I aim to expand my expertise in both technical and linguistic areas.

Certifications

Artificial Intelligence, Web 3.0 & Metaverse
from House, Karachi (ongoing)

Hackathon Achievement

I had the incredible opportunity to participate in Hackathon where I worked on building a Nike Shoe Marketplace from scratch. Over several days, I collaborated on planning, designing, and launching a fully functional e-commerce platform for sneaker enthusiasts.
Key Achievements:
✅ Built a user-friendly marketplace with seamless browsing, product filtering, and secure checkout.
✅ Integrated real-time order tracking and multiple payment options for a smooth customer experience.
✅ Implemented an admin dashboard for efficient product and order management.
✅ Optimized website performance for fast loading and security.
✅ Successfully deployed the project online, making it accessible to users.
This hackathon was a great learning experience, strengthening my skills in web development, e-commerce integration, and teamwork. I look forward to applying these insights to future projects and challenges! 🚀
